

Cellular Broadband MiFi Internet Connectivity

Flexible, mobile, wireless, secure internet connectivity

Product Overview

When internet connectivity is an issue the NOVA Kiosk can be configured with a cellular broadband internet connection device known as a MiFi unit. These units are great for outdoor or remote events, or tradeshows that charge for internet connectivity.

Product Features

- Offers fast and flexible mobile internet access
- Wireless and secure internet connectivity from virtually anywhere
- Connect up to five (5) kiosks to the internet at 4G speeds
