

Tamperproof Keyboard with Trackball

Durable, tamper and spill proof,
ideal for more demanding outdoor
venue kiosk applications

Product Overview

The **NOVA Kiosk** can be configured with a tamperproof keyboard and trackball. We recommend using this option for your more demanding kiosk applications such as sporting events, concerts and most outdoor venues. It is a single unit, one button keyboard and Trackball solution. Trackballs are the preferred navigation device for general public use kiosks. They are user-friendly, and very reliable. The keyboard is reinforced and housed in a brushed stainless steel fitting.
